

KARAMBIT

THE BLACKHAWK KARAMBIT

is designed after the traditional style of Southeast Asian fighting blades that have become popular with special forces units around the world, including the Navy SEALs. The curved claw of the single-side, chisel-grind blade is crafted to slice deeply through both clothing and flesh to inflict maximum damage, making the Karambit an excellent choice for self-defense. The ring on the end of the skeletonized handle is designed for the user's index finger while the dip in the spine is intended for a thumb rest. Combined they give the user unprecedented grip and control over this top-of-the-line fighting tool.

STEEL TYPE: CPM 154CM

ROCKWELL STEEL HARDNESS: 59-60 HRC

STEEL THICKNESS: 0.12"

LENGTH: 7.12" OVERALL

BLADE LENGTH: 2.75"

STONE WASHED FINISH

**HANDLE MATERIAL: BLACK G10 TEXTURED

FIELD

THE BLACKHAWK FIELD

KNIFE is ideal for all-around combat work, featuring a back side ground from the spine to the tip for improved puncture results. This knife is designed for particularly heavy use with the tip being especially strong and resilient. Whether you need to cut, chop, or stab, this multipurpose Field Knife is up to the task. A large, glove-friendly skeletonized handle pairs with an open-tang bottom for striking along with gimping on the spine and pommel for added thumb grip. Put the Blackhawk Field Knife to the test – it won't let you down.

COMBAT DAGGER

THE BLACKHAWK COMBAT DAGGER is double-edged and ideal for combat usage thanks to its unparalleled ability to penetrate both clothing and body. Whether right-handed or left-handed, the ambidextrous design of the handle suits any grip while ramps at the top of the grip prevent the user's hand from sliding over the blade during wet or heavy use. The open-tang pommel of the skeletonized grip is ideal for striking while the lanyard hole gives the user an additional point to secure their blade.

EDC

THE BLACKHAWK EVERYDAY CARRY BLADE is designed for easy concealment anywhere on the body thanks to the low-visibility size and shape of the blade. The compact blade shape and back-side false edge grind allow for exceptionally easy penetration and cutting motion while the finger catch at the top and bottom of the handle provide grip and striking functionality. Whether carried on a belt, inside the waistband, or on a plate carrier, the semi-curved angle from the grip to the blade shortens the overall length to ensure you're carrying comfortably and concealed. The ergonomic skeletonized handle shaves off precious weight and gives the user superior grip when used either blade-down or in-hand.

COMBAT FILET

THE BLACKHAWK COMBAT FILET BLADE

is designed for easy cutting, slicing, and penetration through both clothing and body, making this an ideal blade for both combat and every day field use. The tip of this blade is designed for maximum strength and durability while stabbing and cutting – even when put up to the harshest test. A semi-ambidextrous grip allows for use in either the right or left hand while the finger catch and ramp at the bottom of the handle ensure a firm grip to help prevent the hand from sliding over the blade. The skeletonized design of the grip shaves off valuable weight while the closed-tang bottom provides the user with additional striking capability.

STEEL TYPE: CPM 154CM
