

## BIOBIRD CLAY TARGETS

### MARKET RELEASE DATE:

January 2018

Introducing Champion BioBird Clay Targets – Champion's first clay target made of natural materials! BioBird Clay Targets replace the petroleum-based binder of regular clays with naturally-occurring forestry product and limestone, ensuring they won't acidify soil as they break down. The composition doesn't affect performance – BioBird Clay Targets fly true and break with exceptional smoke with a solid hit. Champion Targets: Own the Range.

### FEATURES

- » Made of naturally occurring forestry products and limestone
- » Will not increase soil acidity levels
- » Competitive break quality
- » Proudly made in the U.S.A.
- » Non-hazardous
