Black Cloud 28 Gauge

More than a decade ago, Black Cloud[®] changed the definition of performance for steel waterfowl loads. That revolution continues today with Black Cloud 28-gauge offerings that redefine the capability of sub-gauges. Like all Black Cloud loads, they use the FLITECONTROL FLEX[®] wad to deliver better pattern density and consistency through both ported and standard waterfowl chokes. The high-performance primer and clean-burning, temperature-stable propellant significantly decrease residue in the barrel.

Features & Benefits

- New 28-gauge loads unlock the potential of sub-gauge steel waterfowl shotshells
- 1400 fps muzzle velocity provides ample downrange energy
- Rear-opening FLITECONTROL FLEX wad improves pattern consistency and density through ported and standard waterfowl chokes
- High-performance primer and clean-burning, temperature stable propellant
- Payload of 40 percent FLITESTOPPER[®] steel pellets and 60 percent Premium[®] steel
- Plated head inhibits corrosion
- Sealed crimp defeats moisture in extreme conditions
