Loading is as easy as 1-2-3.

1. Load your sabot projectile, such as a Smackdown® Carnivore™ bullet, through the muzzle with your ramrod. Push it down the barrel and seat it on the shelf within the barrel. You'll feel the bullet stop with resistance. This provides a consistent starting point every time.
2. Break open the action on the NitroFire™ with the release button located near the trigger guard and insert the Federal Premium® Firestick™ into the breech area.
3. Place a 209 primer into the primer pocket of the Federal Premium® Firestick™. Close up the NitroFire™ and your muzzleloader is fully loaded.

Traditions™, Federal Premium®, and Hodgdon® have changed muzzleloading forever. Pick up the NEW NitroFire™ and feel the difference!
