Big Game Rifle

Fusion 6.5 PRC

Fusion® was the first rifle ammunition specifically built for deer hunting—and it's still the best, offering the best expansion and weight retention in its class. It's an ideal match for the new 6.5 PRC cartridge, which has quickly caught hunters' attention thanks to its long-range accuracy, flat trajectory and manageable recoil. Paired with the Fusion bullet's molecularly fused jacket and pressure-formed core, the new load provides tag-filling penetration and stopping power.

Features & Benefits

- New 140-grain 6.5 PRC offers extended range and accuracy
- Cartridge delivers long-range accuracy, flat trajectory and mild recoil
- Skived bullet tip ensures reliable expansion
- Molecularly-fused jacket around a pressure-formed core for better weight retention than comparable bullets
- Boat-tail design maximizes ballistic coefficient
- Best-in-class weight retention and expansion
