

## FUSION TIPPED

Federal® Fusion® became a legend in the deer woods for a reason. Its pressure-formed lead core is molecularly bonded to a consistent copper jacket, resulting in the highest weight retention, deepest penetration and best expansion in its class. Now, we're writing a new chapter to the Fusion story with all-new Fusion Tipped. The new design offers the same great terminal performance as the original, but with a polymer tip that increases ballistic coefficient, flattens trajectories and boosts energy for better accuracy and extended effective range.

### FEATURES & BENEFITS

- All-new polymer-tipped design
- Reduced wind drift and drop, as well as more energy downrange
- Polymer tip paired with skived nose cavity initiates consistent, lethal expansion.
- Copper jacket is electro-chemically bonded to the core, resulting in a perfectly uniform jacket
- Excellent accuracy
- Maximum weight retention for deep penetration
