

### 30 Super Carry

The new 30 Super Carry handgun cartridge provides the same stopping power as a 9mm Luger with more magazine capacity in the same size firearm. Alternatively, the size of the 30 Super Carry cartridge allows chambering in handguns with even smaller grips and overall size for better concealability. It uses a .312-inch diameter projectile to deliver as much muzzle energy as 9mm Luger, with ballistics and terminal performance that far exceeds that of 380 Auto. This is the most innovative defensive handgun cartridge introduction in generations. It is now available in the Remington HTP (High Terminal Performance) defensive round and UMC target round.

### FEATURES

- Same muzzle energy and stopping power as a 9mm Luger
- Greater firepower (magazine capacity) than a 9mm Luger
- Defensive hollow point bullet in HTP delivers instant stopping power with high weight retention and 2x expansion
- Target full metal jacket bullet in UMC provides excellent accuracy and value for training rounds
- Both HTP and UMC offer first-quality brass cases, high-grade propellants, and Kleanbore primers
- All Remington handgun ammunition is American-made in Lonoke, Arkansas
