

PREMIER® LONG RANGE

Exclusively from Remington, Speer's® groundbreaking Impact™ bullet is now available for the first time in loaded ammunition. Tough bonded construction penetrates deep on closer targets, while the patented Slipstream™ tip initiates expansion at velocities 200 fps lower than standard polymer tips. The projectile's sleek construction and tightly-tapered hybrid ogive combined with its boat-tail ensures a high ballistic coefficient and all the advantages of match-grade accuracy.

Combined with carefully selected brass, propellants and primers, Premier Long Range is ready to perform at any distance that you are. This is Remington's highest quality big game ammunition yet.

FEATURES

- Slipstream tip helps initiate expansion at wide range of velocities
- Impact bonded body designed to stop separation and impart maximum retained energy and weight impact on target
- Boat tail bullet and rear adjusted center of gravity assists truer flight and long-range accuracy
- Highest-quality Remington Premier primers and propellants for ultimate performance across spectrum of environmental conditions
