### RINGS/MOUNTS/BASES

---

#### **34mm Tactical 6-Hole Picatinny Rings**

Heavy-duty doesn't have to mean heavyweight. With a skeleton design, Weaver's new 34mm 6-Hole Tactical Rings are lightweight and incredibly rugged. These rings feature six screws for maximum security and clamping pressure and an improved Picatinny crossbolt design that takes the classic Weaver® Crossbolt to Picatinny spec. The 7075-T6 aircraft-grade aluminum rings feature a Type-3 hard coat anodized finish, no strip/slip Torx screws and three height options to cover almost any tactical precision shooting system.

#### **Features & Benefits**

- Improved crossbolt from Weaver® to Picatinny spec
- Six screws for extra security and clamping pressure
- Made out of 7075-T6 aircraft-grade aluminum
- Type-3 hard coat anodized finish
- Made to exact tolerances in the U.S.A.
