KASPA™ Dark Earth Tactical Scopes

Weaver's KASPA™ Tactical series is now offering two Dark Earth models. KASPA Tactical Series riflescopes offer shooters many of the features of more expensive tactical scopes, but at a budget-friendly price. The line's tremendous value and collection of options—including illuminated reticles, fully multi-coated lenses and reset-to-zero, pull-up turrets—make it a top choice for tactical shooters. The 1.5-6x32mm Dark Earth model features the exclusive Tactical Ballistic-X reticle with drop and windage compensation built in. The 3-12x44mm model offers the EMDR (Enhanced Mil-Dot Ranging) reticle, which is enhanced with hash marks at ½-mil increments as well as dots that feature a .1-mil open center.

Features & Benefits

- Dark Earth color for tactical function
- Fully multi-coated lenses for edge-to-edge clarity
- Rugged one-piece tube construction
- Purged nitrogen-filled tubes eliminate internal fogging
- Rugged 30mm tube allows for multiple mounting options
- Side-focus parallax adjustment on some models for quick focus at distance
