### OPTICS

---

#### Rapid Fire Red Dot

Manufactured to the strictest tolerances, Weaver® Tactical optics are built to perform in the harshest environments. The new 1x 25mm Weaver Tactical Rapid Fire Red Dot is constructed with a lightweight body that is rugged enough to withstand everything an operator can dish out. It also features Weaver's new removable Tactical Mount with a TorqueKnob tool-less thumbscrew to allow fast mounting and transition to a variety of firearms. The 2 MOA red dot with precise .5 MOA click adjustments has six illumination settings, including two settings that are night vision compatible. Other features include tethered windage and elevation caps, a threaded ARD and a low battery indicator. Built to withstand the rigors of real-world operations or excel on the competition stage, this red dot has all the features you demand and reliability you expect.

#### Features & Benefits

- 2 MOA red dot with six illuminations settings, including two that are NV compatible
- .5 MOA click adjustments for competition-level accuracy
- Removable Tactical Mount with thumbscrew
- Flip-up scope caps to protect lenses in any environment
- Low battery indicator for added operational awareness
- Threaded ARD (Anti-Reflection Device) to reduce visual signature
