

# 2019 NEW PRODUCTS

## RELOADING

---

### Impact Component Bullet

Take your hunts, your handloads and your shots farther than you ever thought possible. The new Speer® Impact bullet blends tough, molecularly bonded construction with a high ballistic coefficient. Its groundbreaking Slipstream™ polymer tip provides a perfect aerodynamic meplat, and its hollow core initiates expansion at velocities 200 fps lower than comparable designs. The combination results in deep penetration at mid-range, as well as extreme accuracy and consistent low-velocity expansion at long distances.

### Features & Benefits

- Molecularly fused jacket maximizes weight retention and improves accuracy
- Slipstream polymer tip increases downrange energy and initiates low-velocity expansion
- High ballistic coefficients for flatter trajectories and better long-range performance
- Close-range penetration and long-distance expansion
- Competitively priced

Part No.	Description	UPC	MSRP
TB264H1	264 cal. 140 grain 50-count	6-04544-65063-1	\$25.95
TB308H1	308 cal. 172 grain 50-count	6-04544-65061-7	\$26.95
TB308H2	308 cal. 190 grain 50-count	6-04544-65062-4	\$26.95
